

novatec[®] HPN engineered graphite with Kevlar[®]

Material profile:

- High-performance graphite beater for increased demands and high temperatures
- The main components are graphite and aramid fibres, bound with NBR (vulcanized)
- stable, flexible, resistant to antifreezing agents, fuels and oils

Typical applications:

- Gaskets for engines, compressors, pumps, valve covers
- sealed joint for pipeline construction, for the plant and apparatus construction

Supply data:

- Sheet sizes in mm: 2000 x 1000 mm
- Thickness in mm: 1.0 bis 3.0 mm ± 7%
- Special sizes upon request
- Other thicknesses upon request

General data	Colour:	black			
	Surface:	both sides A310, with branding, optional with PTFE			
	Binders:	NBR

The technical data stated has been determined with standard material under laboratory conditions. With the variety of installation and operating conditions no guarantee claim can be inferred regarding the behaviour in a specific application.

We reserve the right to product changes which serve the purpose of technical progress.
