

SLF FILTER

Pleated Filter cartridge

Pleated polypropylene filter cartridge is used in liquid of prefiltration, clarification filtration and terminal filtration.

It has the advantage of larger filtrated proportion and longer lifetime, which is good at deep-filtration. This product is not easily polluted and has wide chemical consistency which is made by ultra sonic heat-fusing-caking technic with the structure of polypropylene. The accurate range of filtration is from 0.1 μm to 30 μm.

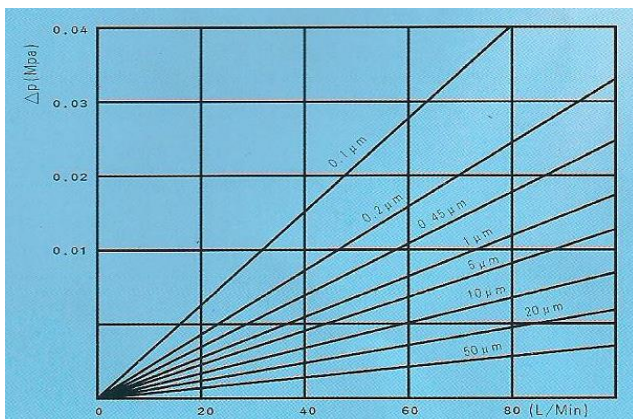

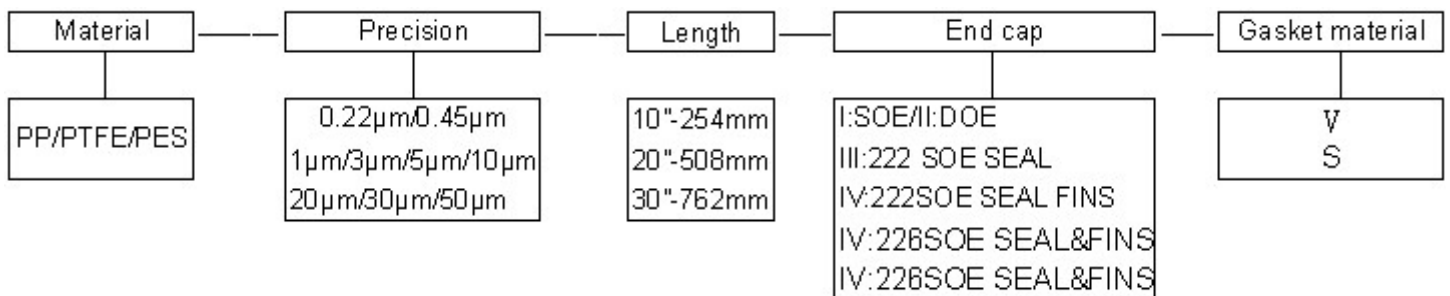

Spec

- ▶ Filter precision: 0.1-30μ
- ▶ Spec: φ 66x250(10") φ 66x500(20")
 φ 66x750(30") φ 66x1000(40")
- ▶ Filter area: 0.5m²(10") 1m²(20")
 1.5m²(30") 2m²(40")
- ▶ Max operating pressure: 0.42mpa, at 25°C
- ▶ Work temperature: < 80°C
- ▶ Effective filter area: 0.40-0.70m²

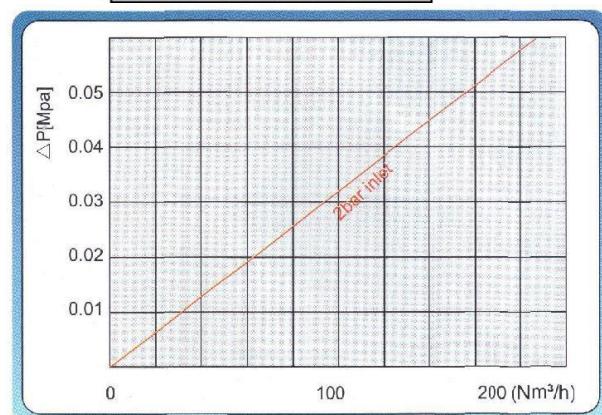

Application:

It is widely used to prefiltrate and refine in sanitary field, electronic field, medical field, chemical field and oil field.
